Our company was established in 1997, and for more than 25 years our team has been helping Czech entrepreneurs with taxes and accounting. During this time, we have saved **our clients significant amounts in taxes.**

Through precise accounting, we ensure that our clients can make business decisions **with confidence-free of stress** and with the knowledge that they are based on the right data – for both their business and all relevant administrative authorities.

We primarily focus on helping companies of Czech owners and entrepreneurs who are interested in distributing profits from their business.

Our priority is to **protect the owner's property** and ensure that, even in unforeseen event, property damage is kept to a minimum.

We also provide other services such as **auditing, accounting, legal assistance and tax consultancy.**

### Our vision and mission

We approach each client individually according to their requirements and guarantee complete discretion in our cooperation.

Our goal is to minimize risks for both the company and its owner, both–commercial and public.

We will always work together to find the optimal solution for a specific situation, which we analyze from legal, accounting and tax perspective, taking into account the specifics of your business model. In our cooperation, we build on the proven knowledge of the local environment, as well as on the international expertise of our professionals.

We also pay attention to balancing the tax burden and minimizing the risk from state authorities.

### What are we based on?

- High content and formal quality
- Timeliness of services provided
- Independent assessment of the situation
